

Static Solutions® ESDTEST-WEB

EsdTest Global Networking Website System

Store ESD measurements from all global manufacturing facilities in an SQL database, view six report types from any secure web browser.

Provides complete sortable reports instantly for supervisors and ISO audits. No more log books!

Test each foot and wrist simultaneously and individually in a single two second test. Uses a bar code or badge reader to identify employee, then test, opens a door, records, and prints or emails data for up to 30,000 employees.

Exception report will inform if worker did not test once or twice a day.

### Identify

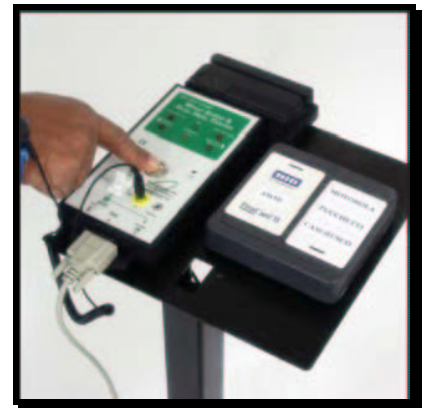

Scan using keyboard, barcode, or mag stripe, HID™, CASI-RUSCO™, MOTOROLA™, or AWID proximity reader.

### Press

Attach wrist strap, step on dual plate and press metal button.

### Pass, Fail, or Retest

Employee passes or fails. Supervisor analyzes data and reads exception reports or email

## Add or modify employee names and badge numbers

## Description

The EsdTest software captures the Esd resistance test data from the test station, and stores the data in your company's SQL data base. Time zone differences are accounted for. The EsdTest Global Networking Website System allows viewing the data instantly from any secure web browser on your company's LAN. User information such as badge numbers can be modified on-line by anyone on the LAN with the proper security clearance. Data may also be printed or imported to Excel.

## Features/Benefits

System can generate the following reports which are sortable and filterable by:

- Start Date
- End Date
- Department number
- Employee ID
- Last Name
- First Name
- Station number
- Facility GMT time difference
- 1. Log of the measurement results
- 2. Exception report (employees who failed or forgot to test)
- 3. Twice Tested Exception report
- 4. Monthly summary
- 5. Area occupancy (in case of emergency)
- 6. Attendance report
- Managers and supervisors have instant access to data from anywhere
- Employee name and badge# can be obtained from company database
- ISO -9000 conformance- no more log books
- Keeps track of global time zone differences
- Records test station number
- Simple operation
- Can also be used with USB, Ethernet, or wireless adapter accessories
- Opens doors
- Can print labels as an upgrade
- Adjustable US and European limits • CE mark listed
- Automatically stores results for 30000 employees
- Supervisor can select specific work groups
- Reports and data can be exported to Excel, Access, or SQL data bases
- Password or Windows authorized user protection

## Specifications:

Test station Operating system	Most Windows operating systems: 98, ME, 2000, XP, Vista.
Test station EsdTest version	Requires EsdTest ver 10 or higher
Website Operating system	Most Windows operating systems and servers: 2000, XP, Vista. Requires MS Active Server Pages (ASP)
Company Data Base	SQL2000, SQL 2005, or SQLExpress (free)
	Each log measurement entry requires 100 bytes of storage (when you press the test button)
	Each employee requires 200 bytes of storage for name and badge information
